**NEW GUTHLITE**

PATD. & PATS. PENDING—TRADE MARK REG.  
Packed one to a carton.

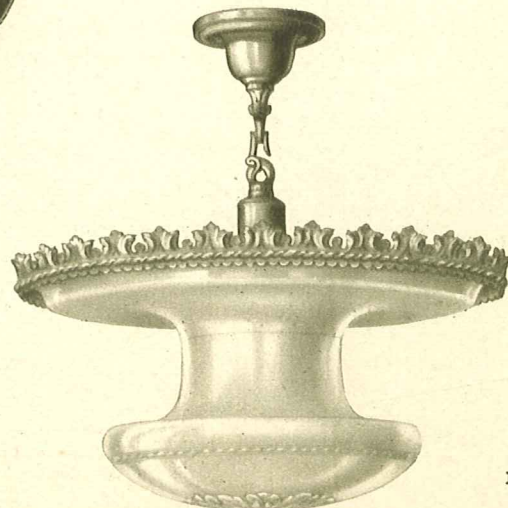

Hanger and  
Ornamental Band  
Finish F557  
Reflector—White  
Porcelain Enameled  
With Moulding Ivory

1. (Socket) — New Fixture Supporting Socket, exterior threaded, providing simple means for positioning the reflector that controls the amount of upward or downward light.
2. (Globe Holder) — Spring type, concealed, simplest form of globe holder.
3. (Reflector) — Porcelain Enamel White Reflector. Adjustable, controlling and redirecting all of the upward light rays.
4. (Globe) — A specially shaped globe to produce maximum light output immediately around the lamp. The extended lower portion reduces glare and conceals the bright neck from sight. The top of

the extended portion, where dust will settle, is shaped so that it cannot be seen and absorption therefrom will be negligible.

5. (Mazda Lamp) — Lamp positioned high in this unit so that downward light distribution is uniform throughout the lower radius wherein all of the light from the lamp below the holder is diffused and reflected to a useful plane. The light that is usually lost in a globe holder, approximately 7%, is utilized for ceiling illumination and also prevents shadow from the opaque reflector. This construction provides a useful feature in keeping the lamp base open and cool.

**NEW BRASCOLITE**

PAT. PENDING TRADE MARK REG.

Packed one to a carton.

1. (Socket)—The New Guth Socket provides an insulated and safe fixture support; eliminates bridges, hickies, screws and saves time.

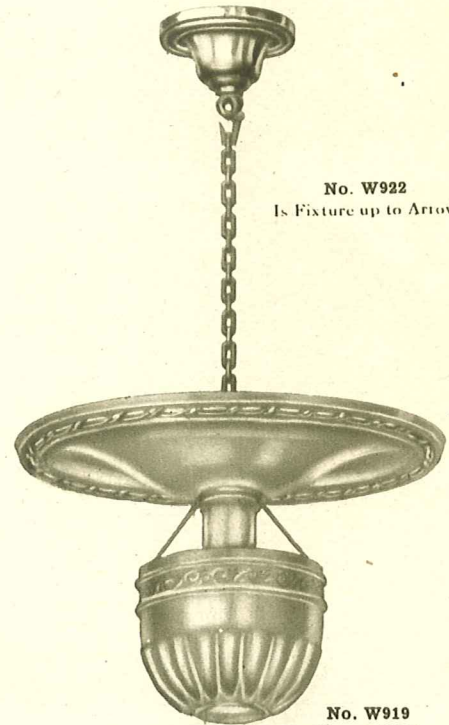

2. (Reflector)—White porcelain enameled reflector maintains efficiency for all time.

3. (Collars)—Collars supporting bowl and reflector independently allow for adjustments.

4. (Knockout)—Switch knockout for standard pull switches.

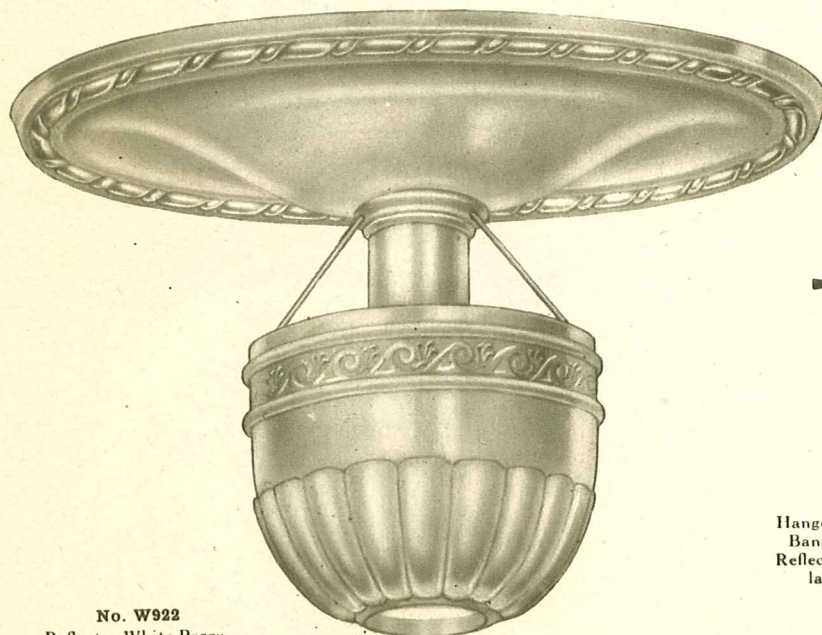

5. (Bowl)—Pressed rugged diffusing glass bowl, formed to reduce glare and to develop maximum light output.

6. Opening in bottom of bowl to permit direct downward rays—prevents accumulation of dust and bugs, and permits free circulation of air around the lamp.

**Method of Installing Aglites and Bracket Types**

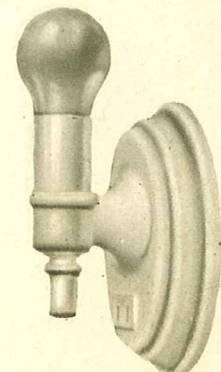

Bridge (No. 1) is attached to any standard outlet with locknut furnished.  
Attach house wires to porcelain socket (No. 3) and clamp it in canopy (No. 5).  
Place canopy in position towards ceiling (or wall) with screws (No. 2), projecting through keyhole slots (No. 4).  
Turn canopy to right and tighten screws (No. 2) with screw driver.  
Glass shade (No. 6) is then placed over Bakelite screw collar of socket and held in position by patented, internal threaded collar (No. 7).  
When light is installed no metal parts are visible.

No. A1071

The AGLITE line of porcelain enamel units is ideal for use wherever cleanliness and sanitation are paramount. They harmonize perfectly with the interiors of white tiled bathrooms, kitchens, hospitals, laboratories, etc.  
AGLITE canopies are stamped from a single piece of heavy gauge Armco iron and three coats of permanent porcelain enamel are then fused on at 1,600 degrees Fahrenheit in our electric porcelain enameling furnaces. This process insures a smooth surface that is self-insulated and is guaranteed not to check, peel, tarnish, rust or discolor.  
No metal parts are visible, as AGLITES require no projecting set screws. The pure white glass shade is attached by means of a concealed metal screw collar which holds the glass firmly in place yet permits its adjustment in the bracket types so that the light may be directed wherever required.  
A damp cloth rubbed once over the fixture makes it bright and clean.  
Installation is made direct to house wires in five minutes with only screw driver and pliers. No canopy insulator is required. No splicing, soldering or taping of wires is necessary.  
Standard colors—White, Old Ivory and Gray.  
All parts furnished ready for installation.

Galvanized Iron—Sprayed Aluminum  
Keyless Porcelain Sockets—  
Spaced 4" on Centers  
Made in Straight Sections  
Standard Length—48 inches  
Wired Three Circuits  
Price per section—\$50.00 Code, Clean

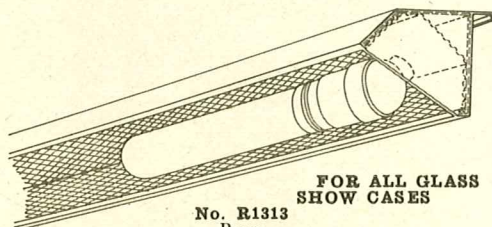

**DISPLAY WINDOW AND  
BULLETIN BOARD LIGHT**  
No. R1309  
Height 5 1/4" O. A. Extends 5 3/4" O. A.  
Finish F170  
Diffusing Glass Plate  
Twin Keyless Porcelain Sockets—  
spaced 24" on centers  
Fastened with wood screws  
Price per foot or fraction thereof, \$8.45  
Code, Clay

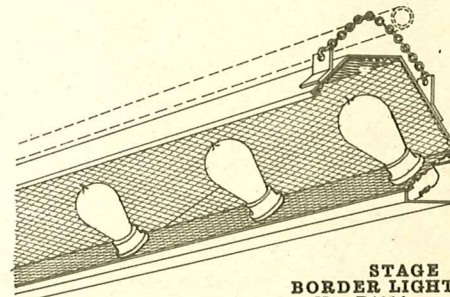

**COVE LIGHTS  
FOR ALMOST VERTICAL ILLUMINATION**  
No. R1311  
Height 6 3/8" O. A. Extends 4 3/4" O. A.  
Twin Keyless Porcelain Sockets—Spaced 24" on centers  
Metal clips included for fastening unit  
Price per foot or fraction thereof, \$5.40 Code, Clear

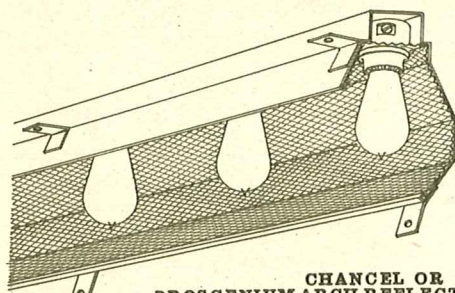

**COVE LIGHT FOR 45° ANGLE ILLUMINATION**  
No. R1312  
Height 6 3/8" O. A. Extends 4 3/4" O. A.  
Twin Keyless Porcelain Sockets—Spaced 24" on centers  
Metal clips provided for fastening unit  
Price per foot or fraction thereof, \$5.40 Code, Clear

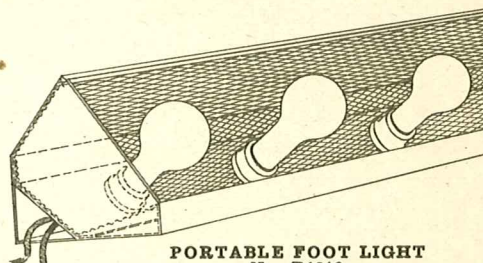

**FOR ALL GLASS  
SHOW CASES**  
No. R1313  
Brass  
Height 2 3/8" O. A. Extends 2 1/2" O. A.  
Finish F125  
Angle Cap Keyless Socket—Spaced 12" on centers.  
Metal clips included for fastening reflector to glass case  
Takes standard medium base tubular lamps  
Price per foot or fraction thereof, \$6.25 Code, Clef

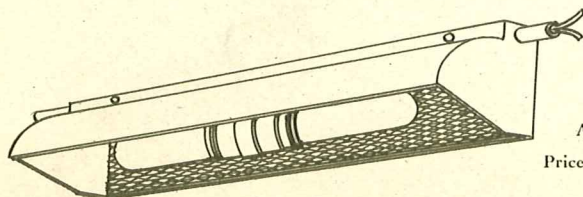

**STAGE  
BORDER LIGHT**  
No. R1314  
Height 6 3/8" Extends 6 3/8" O. A.  
Keyless Porcelain Sockets—Spaced 12" on centers  
Clips and Jack chain included—Pipe support not furnished  
Price per foot or fraction thereof, \$6.75 Code, Clef  
Note—Extra sockets on same circuit, \$0.50 each additional.  
Extra sockets on extra circuit,  
.80 each additional.

**CHANCEL OR  
PROSCENIUM ARCH REFLECTOR**  
No. R1315  
Height 9" O. A. Extends 5" O. A.  
Keyless Porcelain Sockets—Spaced 12" on centers  
Metal clips provided for fastening unit  
Price per foot or fraction thereof, \$5.65 Code, Clerk  
Note—Extra sockets on same circuit, \$0.50 each additional.  
Extra sockets on extra circuit, .80 each additional.

**PORTABLE FOOT LIGHT**  
No. R1316  
Height 7" O. A. Extends 6" O. A.  
Finish F170  
Keyless Porcelain Sockets—Spaced 12" on centers

**The New Guth Fixture Supporting Socket Saves  
Half Your Installation Time**  
(U. S. and foreign patents pending)

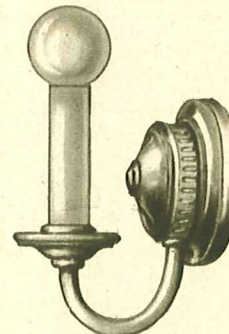

This simple, substantial improved socket—the Guth support for electrical fixtures and Mazda lamps of standard bases—is a valuable electrical invention.

A twist of the wrist, splicing the wires, and the job is done!

In actual demonstration tests it carried 236 pounds—that's a factor of safety for any job.

A metal supporting cap carries the insulated, threaded socket housing through two steel screws, properly spaced and insulated from live parts. The fixture is adjustable and completely insulated. Lamp-filament position controllable on reflector-type fixtures.

The 3/8" pipe size cap allows attachment of the flexible asbestos polarized wires either through or beside it. No hickey, bridges, supporting screws or canopy insulation needed. Another Guth Fixture Advantage.

For Telegraphic Figures Use the Following Key:

B R A S C O L I T E  
1 2 3 4 5 6 7 8 9 0

New Brascolite and New Guthlite will make lighting history. Greater light output and still lower prices make these two units the outstanding luminaires for business buildings. They are made in sizes and styles to fit all needs.

Fewer units are needed for a given area, making them the lowest cost light controlling units for all types of installations.
